gh github.com/sadlyahamed

Results-driven Full Stack Java Developer with exactly 2 years of proven experience engineering highly scalable, enterprise-grade applications. Proficient in modern architectures utilizing Java 21, Spring Boot, and Angular, with deep expertise in complex data modeling, stateless security, and high-throughput transaction processing. Adept at bridging the gap between robust backend systems and dynamic frontend user interfaces to solve complex business challenges.

TECHNICAL EXPERTISE & CORE CONCEPTS

Backend Core:	Java 21, Spring Boot 3, Microservices, RESTful APIs, Spring Security, JWT, LDAP, Message-Envelope Pattern, WebSocket (STOMP).
Frontend Core:	Angular 20 (TypeScript), RxJS, Ng-Bootstrap, SCSS, State Management, Lazy Loading, Real-time Validations, Angular-Slickgrid.
Database & Data:	Oracle DB (PL/SQL Stored Procedures, Functions, Triggers, Views), PostgreSQL, JPA, Optimistic Locking, Soft Deletes.
Tools & Familiarity:	Flutter, Dart, Android Development, Python, C++, Docker, Jenkins, AWS, Elasticsearch, RabbitMQ, Kafka, JasperReports, Git.

PROFESSIONAL EXPERIENCE

SoftCafe IT Solution Bangladesh Limited

Oct 2024 – Present (2 Years)

Full Stack Java Developer

Architecting and maintaining mission-critical enterprise systems, balancing robust backend design with responsive frontend architecture for prominent financial and government institutions.

1. Financial Management System (FMS)

Client: Ansar VDP

Java 21, Spring Boot 3, Angular 20, Oracle DB (PL/SQL), JWT, LDAP, JasperReports

- **Enterprise Financial Platform:** Designed and developed an end-to-end ERP/financial management system handling Budget Planning & Demand, General Ledger (GL), Chart of Accounts (COA), and multi-tier Fund Management (Welfare Trust, Local Fund, Flour Mill Fund).
- **High-Performance Architecture:** Implemented a unified message-envelope command dispatcher pattern in fms-server and CommonService, decoupling HTTP transport from domain services.
- **Security & Authentication:** Integrated stateless JWT authentication with dual verification support (Database users and LDAP/Active Directory) and fine-grained Role-Based Access Control (RBAC).

2. RLTS - Retail Loan Management System

Client: Dhaka Bank

Java 21, Spring Boot, Angular, Oracle DB (PL/SQL), JPA

- **Enterprise Loan Processing:** Designed and maintained an end-to-end Loan Management System handling applicant onboarding, co-applicants, guarantors, document verification, and disbursement.
- **Architecture & Backend:** Built enterprise-grade backend services with Java 21 and Spring Boot, implementing a unified messaging envelope pattern for secure request dispatching and loose coupling.
- **State Machine & Workflow:** Implemented a robust loan status workflow engine powered by Oracle PL/SQL state-transition rules with strict Maker-Checker audit compliance.
- **Complex Data Modeling:** Engineered multi-party relationship models (shared customer records, deduplication, optimistic locking, and soft deletes) across Oracle Database and JPA entities.
- **Modern Frontend:** Developed dynamic and responsive user interfaces using Angular, integrating shared grid components, custom state management, and real-time form validations.

3. Remittance Management System

Client: Dhaka Bank

Java, Spring Boot Microservices, Angular, SlickGrid, Oracle DB (PL/SQL)

- **Core Functionality:** Built and maintained an enterprise-grade Inward Foreign Remittance Management System handling multi-channel disbursements (CBS Account Credit, Cash, MFS like bKash/Nagad, and NPSB/BEFTN).
- **Third-Party Integration:** Integrated third-party Exchange House APIs (Ria, Instant Cash, Remitly) with strict AML/Sanctions screening and Maker-Checker approval workflows.
- **High-Volume Processing:** Developed optimized Oracle PL/SQL stored procedures and Spring Boot micro-services for high-volume transaction processing, reconciliation, and automated government incentive calculation.
- **UI & Reporting:** Designed responsive UI using Angular and SlickGrid for high-throughput daily remittance monitoring and regulatory reporting.

EDUCATION TRACK

Postgraduate Diploma in Information Technology (PGD-IT) — Jahangirnagar University, Dhaka

Enterprise Systems Analysis & Design (J2EE) — IsDB-BISEW IT Scholarship Programme

Master of Business Administration (MBA) — National University, Bangladesh

Bachelor of Business Administration (BBA) — National University, Bangladesh
